

Acronis® True Image Home 2009

Acronis True Image Home 2009 is a comprehensive backup software based on proven technologies. With its user-friendly interface it is the ideal solution for home users.

Whether you want to backup the entire PC including the operating system, applications, data and all settings or just individual files and folders, the wizard-guided process can get the desired result quickly. In case of a disaster or failure, your entire PC is restored within minutes. Individual files can also be easily restored from a backup.

With the new One-Click Protection feature the PC is protected from the outset. During installation the software analyses the system to propose an appropriate backup strategy, which the user can directly accept or amend. The status of the backup process can be seen at a glance with the Backup Status feature.

Specially tailored to the needs of home users, the easy-to-use Acronis True Image Home 2009 backup software is the best choice. You get a sophisticated application with a huge range of functions and a user-friendly interface in Vista look and feel.

Features

- Disk imaging
- File backup
- Incremental and differential backups
- Backup by file categories
- Backup of application data
- Acronis Secure Zone
- Acronis Startup Recovery Manager
- Try&Decide
- Privacy tools
- Image encryption with AES
- Smart scheduler

New Features:

- **One-Click Protection** – Create a backup strategy according to analysis of the system and implement it with just one click
- **Acronis Dual Backup** – Store in another pre-defined location in a pre-selected format
- **Backup Consolidation** – Efficient use of hard disk space by automatic or manual consolidation of backup files
- **Image Management** – Select image and apply desired action: Creation (incremental, differential), validation, task planning, consolidation
- **Backup to different locations** – Incremental and differential backups do not need to be in the same place as the full backup
- **Try&Decide** – Safe environment for risk-free testing of new software or visiting websites with potentially dangerous content; Keep the Try&Decide mode on during reboot; automatic activation upon (de)installation of applications
- **Option to exclude of files and folders** from the disk image
- **Extended Task Scheduler** – Automatic backup to external hard disk when available
- **Integration with Windows Desktop and Google Desktop Search** – Indexed backups allow backup files and content to be located quickly
- **New user interface in Vista look and feel** with optimised scheduling, task tracking, and improved wizards

Acronis True Image Home 2009

Features
