

ACRONIS TRUE IMAGE 11 HOME REVIEWER'S GUIDE

Acronis® True Image 11.0 Home™ provides the maximum flexibility to ensure you are adequately protected and can recover from unforeseen events such as viruses, unstable software downloads, and hard drive failures. Create an exact copy of your PC for a full backup or backup only your important data and application settings - your choice! We've loaded this release with new functionality and added your favorite Acronis utilities, worth \$90 on their own – more value than ever in one box.

New Features:

- Try&Decide – turns your system into a safe sandbox
 - Event-based backups
 - Privacy Protection
 - System State Backup
 - Exclude files and folders from backup
 - Preserve files and folders during restore
 - Raw sector-by-sector images
 - Automatically maintained catalog of backup locations
 - Search for file in all archives
 - Message-level Outlook data restore
-
- **Disk Imaging** - Acronis True Image includes our patented disk imaging backup technology. You can copy your entire PC, including the operating system, applications, user settings, and all data. In the event of a system or disk crash, virus attack or other fatal failures you can restore the entire disk contents in minutes - no reinstallations required!
 - **Backup your documents, music, video, photos, and e-mails** - Protect your digital memories from a fatal system failure. Unlike traditional printed pictures or music CDs if you PC crashes those memories will be lost forever without Acronis True Image.
 - **Protect your applications** - Use Acronis True Image to restore all the settings for Microsoft® Office™, iTunes™, Media Player™ and dozens of other most popular applications!
 - **Try&Decide** - create a temporary, safe place on your hard disk where you can perform changes to your system that otherwise might not be advisable, such as installing new software, downloading files from the Internet, or opening e-mail attachments. If the operations are successful, you can apply those changes to the real system or discard the changes as you wish.
 - **Security and privacy tools** - Use Acronis Drive Cleanser®, File Shredder and System Clean-up utilities you to protect your privacy by safely destroying sensitive data, cleaning up your system, or securely wiping the entire hard drive.

Feature	Benefit
Try&Decide	
EXCLUSIVE! Turn your system into a safe sandbox for installing new software or browsing potentially risky websites	Protect your system from hazardous changes at a single mouse click. You decide when and whether to accept all changes to your system
Backup	
Create an exact copy of your PC for a full backup	Protect everything on your system, including operating system, applications all updates and data.
Live Backups	Continue to be productive by using your PC during backups
Backup your data in specific categories, such as Office documents, financial records, music, photos and videos	Ensure that your digital memories, records and important are protected
Backup Microsoft Outlook	Preserve email, contacts, calendar, tasks, e-mail rules and other user data and settings
Backup application settings for the following applications: <list>	Protect your application settings and avoid the time-consuming process of restoring your favorite settings over and over
NEW! Backup your system state	Protect Registry, boot files, as well as important system files from system crashes
NEW! Exclude files and folders	Save space when creating backups by ensuring that you are not backing up the information you don't want to keep
NEW! Automatic catalog of all your backups	Easily locate your archives as system automatically remembers their placement
Create incremental and differential backups	Enjoy faster backups by only capturing changes since last (incremental) or last full (differential) backup

Restore

Recover your entire PC from an image	Avoid wasting time on locating your application software CDs and licenses, reinstalling and reconfiguring programs
Restore specific data	Quickly browse and recover important documents from your backup archives
Restore application settings	Avoid the hassle of reconfiguring your applications again in the case of failure
EXCLUSIVE! Boot-time Restore	Use your system while your PC is being restored
EXCLUSIVE! Acronis Recovery Manager™	Boot your computer to start recovery process without any boot media by simply pressing F11 key, even if your operating system has failed
NEW! Message-level Outlook restore	Quickly locate and recover your important messages from mail backup
NEW! Preserve files and folders during restore	Make sure your newly entered important data would not be overwritten by recovering from older backup
NEW! Search and explore archives	Easily search for and recover particular files from all your known backup archives

Management

Backup strategies	Schedule backup tasks that will back up all data, data changed since the previous backup or data changes against the initial backup (i.e. perform full, incremental or differential backup) in a predefined sequence
-------------------	--

Create backup archive rules	Ensure that you will not run out of space by setting limits on the amount of space allocated for backups, the number of backups and the amount of time you keep backups. The application will automatically manage backups and provide space for new backups
Email notification	Peace of mind by obtaining notifications that your pending backup tasks have been completed
Backup scheduler	No need to remember to run your backups on a regular basis; scheduler will do it automatically and you don't have to care about your backups as long as traffic light indicator shows green
NEW! Set and forget	Configure it once and you don't have to care about your backups as long as traffic light indicator shows green
NEW! Smart Scheduling: start backup on user idle, login/logout or other events	Automatically protect your system from potentially hazardous changes
NEW! Schedule periodic backup validation	Ensure that your backups do not get corrupted, so restore would actually work
Privacy Protection	
NEW! Drive Cleanser	Protect your sensitive data when you are discarding a hard drive or returning leased system by securely erasing the whole hard drive
NEW! File Shredder	Wipe private or confidential data in individual files using latest multi-pass algorithms
NEW! System Clean-Up	Protect your privacy by cleaning up your activity track stored by Windows

System Upgrades

PC cloning	Upgrade your PC without the need to reinstall the operating system and applications, or configure user settings
Add a new hard disk	Expand your PC's storage capability

Storage Media

Supports the following storage locations: Flexibility to store your backups where you want to

Hard Disk Drives
Networked Storage Devices
FTP servers
CD-R/RW, DVD-R/RW, DVD+R/RW
Zip, Jazz and other removable media
PATA(IDE), SATA, SCSI, SAS(**NEW!**),
